

Communication and clarity - Fraser Dove International explains how Kyloe makes the complicated simple

What did you work with Kyloe on?

We partnered with Kyloe to transfer from Invenias to Bullhorn which included setting us up on Bullhorn ATS and Bullhorn Automation, and making sure all of our data was migrated safely and securely.

How did the project go?

The project went smoothly, almost too smoothly at times that we had to question if we were missing something! It isn't easy, that's for sure, and it can be a real minefield at times but the Kyloe project team ensured everything was simple and digestible to get us through it. A strong internal project team to work alongside Kyloe is a must!

How has it impacted your business?

Bullhorn has transformed day-to-day operations at Fraser Dove, by streamlining processes, enabling reporting functionality that was not previously available, and generally being a better fit for our requirements.

How did Kyloe help you?

Kyloe made it very clear to us what would be involved in the project, what would be expected of us and what we would need to do to get it over the line. Kyloe were communicative from the beginning and still continue to be now, a good few months after we started the project! No problem was ever too big for Kyloe, we felt supported during the whole project and that is testament to the project team!

Would you recommend using Kyloe? (and if so, why?)

Yes, Kyloe have been fantastic from the beginning, and we have built such a strong relationship with the team. Nothing is ever too big an ask - Kyloe make the complicated simple and ensure the project does not interfere with your day to day role as much as possible. I would highly recommend Kyloe to anyone requiring support on their implementation.

"Kyloe have been fantastic from the beginning, and we have built such a strong relationship with the team. Nothing is ever too big an ask - Kyloe make the complicated simple..."

Sian Macintyre | Project Manager @ Fraser Dove International
