Kyloe™

Here's how IDR cuts 45 minutes per candidate submission in Bullhorn with Kyloe AwesomeDocs

Create, sign, and save your recruitment and staffing documents with unparalleled speed and accuracy.

"I feel we went from the Stone Age to the most advanced technology that does what we need to do overnight."

Matt Barnes, Director of Operations @ IDR Healthcare

Objectives

- Implement standardized resume formatting to ensure consistency across all client submissions.
- Create a centralized, secure database for storing all candidate information accessible to authorized personnel.
- Streamline the submission packet creation process through automation and standardized templates to reduce manual work.

Results

Increasing submission-to-offer ratio

"We've seen a significant increase in our unique submission-to-offer ratio. This means **we're getting more offers per unique submission**, which is a direct result of having more consistent and high-quality resumes."

Saving up to 45 minutes per submission packet

"The speed at which we can turn around candidate submissions has improved, we are saving 15 minutes per candidate, leading to quicker offers. Some candidates we create 2 to 3 packets for so we're looking at **30 to 45 minutes saved per candidate.** You're probably looking at 10 hours a week that we're saving."

Improving client and candidate experience

"Kyloe AwesomeDocs has done everything I could think of and even more so. **Our clients have been very pleased with the consistency and quality of the resumes** they're receiving and this has led to better relationships and more trust."

A Bullhorn game-changer

"Kyloe AwesomeDocs **is a game-changer for our recruitment process** , and I believe it could benefit any staffing or recruitment company."

Kyloe AwesomeDocs

Fill more placements and business

Reduction of manual effort means quicker submission of candidates, beating out competitors and impressing clients with quality talent

Improve client and candidate experience

Professionally branded and accurate documents present a consistent and reliable experience that people want to interact with

Reduce compliance risk

Improve document accuracy (like contracts and terms of businesses), and reduce the risk of incorrectly placing unqualified candidates

Cut operating costs

Employees spend less time preparing, sending, chasing, and saving documents, and user-based e-signature subscriptions are eliminated.

Kyloe AwesomeDocs
Key features

Create accurate and branded files in a few clicks

Automated document creation and formatting

- Kyloe AwesomeDocs templates allow the creation of any candidate and client-facing document from any entity in Bullhorn in a matter of clicks.
- Ensure your documents contain everything needed by pre-loading your own custom templates that can combine files from multiple sources (inside and outside of Bullhorn), format them, and order them in the correct way.
- Automatically fill in the blanks in your documents by pulling data from Bullhorn (single or cross-entities). Duplication of work, and errors resulting from manual input, become a thing of the past.
- Setup client specific automation and automatically populate the correct clauses and terms and conditions for faster and more accurate outputs.
- Add a professional polish by saving your logo, colours, and font as part of the template, for beautifully branded and perfectly formatted documents, every time. Prefer to use the facility branding, or have no branding at all? Not a problem - the choice is yours and can vary between templates!
- If credentialing is important to you then you'll love how Kyloe AwesomeDocs automates the creation of credentials and links them to credential requirements.
- If you need to hide candidate details ahead of sharing with clients, you can use Kyloe AwesomeDocs to automatically anonymise files before you hit the send button.

Send contracts 50% faster

Accelerate document signing with DocuSign

- Documents get completed and legally signed, error free, in minutes, radically accelerating cycle time to generate results – and revenue – sooner.
- Get email notifications after document interaction with the ability to view activity - allowing you to spot and clear any potential bottlenecks.
- DocuSign functionality in Kyloe AwesomeDocs includes two-way interactive fields to update data (flowback into Bullhorn fields) without the need for copying and pasting - because your time is too valuable.

Improve visibility and collaboration

Automatically save files and credentials back to Bullhorn

- Save historical versions of files or keep only the final - either way, they'll be stored centrally in Bullhorn (in the cloud), for instant access, when you need it.
- Watch as signed documents automatically save back into the right place in Bullhorn, without you having to lift a finger!
- Request credentials from candidates and reduce compliance risk by ensuring that only qualified people can be submitted to jobs. Be confident that credentials provided are safely stored, easily accessible, and linked to credential requirements.
