More than just a setup: Engage's in-depth Bullhorn implementation with Kyloe

Migration from FastTrack 360

Tailored system configuration

Training & post go-live care

With a legacy system that was no longer evolving, Engage needed a scalable, modern solution to support their recruitment processes and growing business needs. After Bullhorn introduced them to Kyloe, Engage found the expert implementation partner they needed to ensure a smooth, supported transition.

"The depth of the Kyloe configuration was far more hands-on and in-depth than any implementation we'd done before and made us feel very comfortable."

Jacob Stinson, Operations Manager | Engage

The Kyloe solution

Kyloe supported Engage with the full handover from FastTrack 360 to Bullhorn, including:

- ✅ Complete database migration
- ✅ Configuration of ATS, Automation, Analytics, and Onboarding
- ✅ Product, systems admin, and end-user training
- ✅ Ongoing post-go-live support

How did Kyloe help you?

"Kyloe guided us through every step and were always available. Hearing, 'Just because you've done it that way, doesn't mean you have to keep doing it that way, here's an alternative approach', was really valuable.

We had robust conversations about what we needed the system to do, and they found workarounds that worked for us. The hands on and end user training was also great – our team had never experienced that level of involvement before."

Would you recommend Kyloe Partners?

"I would highly recommend Kyloe - they have been endlessly supportive throughout the project.

Their patience, deep knowledge of the system, and constant availability - whether for training, configuration, or answering questions left, right, and centre - was great!"

Jacob Stinson, Operations Manager | Engage

How has it impacted your business?

"Our teams picked it up quickly and we're excited to improve our efficiencies and move away from manual email and recruitment admin tasks."

6 months in they're seeing:

- Greater reporting and tracking abilities
- Improved searchability and ease of user interface
- Greater engagement across recruitment and management teams
