

Moving from Adapt to Bullhorn: Bullhorn implementation including Bullhorn Automation and Bullhorn Analytics

What was the project that you worked with Kyloe on?

After ten years with Adapt, Kyloe moved us to Bullhorn migrating almost 500,000 candidates and contacts plus their notes, along with all CV/resume submissions, interviews, and placements. As part of this, Kyloe ensured all data was migrated safely and securely, and that Bullhorn was configured correctly for our needs, plus trained our users so that we could hit the ground running. They also enabled us on Bullhorn Automation and Bullhorn Analytics.

How did the project go?

The project with Kyloe went very well. With such a large migration we'd expect a few issues and were happy that these were kept to a minimum. Kyloe took the time to load sample data in the first instance so that any issues could be identified and resolved ahead of migrating the full database. This ensured that records were transferred correctly and made the process far smoother.

How has it impacted your business?

We now have a much greater command of each of our consultants' business, and our consultants have a much simpler interface for managing their desks – meaning more time for actual recruitment and more time to work for our clients.

Would you recommend partnering with Kyloe?

I'd definitely recommend choosing Kyloe for anything related to Bullhorn. The team were always available to ensure things were progressing as smoothly as possible, and really responsive when we contacted them. The training was comprehensive and the team showed great flexibility regarding timing when operational priorities have forced us to rearrange our sessions.

"Kyloe ensured all data was migrated safely and securely, and that Bullhorn was configured correctly for our needs, plus trained our users so that we could hit the ground running."

Dan Wardle, Head of Recruitment @ Maclean Moore
